

Project Scope – VOYA

1. Project Description

Voya is a collaborative travel planning application that helps groups organize trips by combining itinerary management, budgeting, and communication in one platform. The system allows users to create trips, invite members, plan daily itineraries with Google Maps integration, vote on activities, and manage shared budgets.

Unlike traditional travel planning tools that require multiple spreadsheets or group chats, Voya provides an all-in-one environment for organizing trips before and during travel. Its design emphasizes usability, collaboration, and efficiency.

2. System Features

2.1 User Accounts

- 2.1.1 User registration and authentication (login/logout)
- 2.1.2 Profile management for personal details.
- 2.1.3 Invite and add trip members by email/phone number

2.2 Trip Management

- 2.2.1 Create new trips with name, destination, and travel dates.
- 2.2.2 Add and remove participants.
- 2.2.3 View upcoming trips on the dashboard.

2.3 Itinerary and Activity Planning

- 2.3.1 Create itineraries with daily activities.
- 2.3.2 Enable members to propose and vote on activities.
- 2.3.3 Display activity results based on votes.

2.4 Budget and Expense Tracking

- 2.4.1 Add, edit, and delete expenses within each trip.
- 2.4.2 Track total spending and contributions by each member.
- 2.4.3 Display a shared budget summary.

2.5 Notifications and Reminders

- 2.5.1 Send reminders about upcoming trips or deadlines.
- 2.5.2 Notify members when activities are added or votes are cast.

2.6 Maps

- 2.6.1 Integrate with Google Maps to view destinations and travel routes.
- 2.6.2 Share live location with group.
- 2.6.3 Add, edit, suggest, and delete stop markers throughout the trip.

2.7 Other

2.7.1 Dark/light mode for UI preference.

2.7.2 Export itinerary as a shareable file (PDF or link).

2.7.3 Zoom and scroll support where necessary.
